Abstract of JP2003171315

<P>PROBLEM TO BE SOLVED: To prepare an injection which enables the effective stay of a medicine in an ocular tissue over a long period. <P>SOLUTION: When the injection containing a medicine-PEG combination is injected into the ocular tissue, the medicine stays in the ocular tissue such as margo ciliaris iridis, vitreous body, retina, or optic nerve, whereby the efficacy of the medicine can be sustained over a long period by one administration. <P>COPYRIGHT: (C)2003,JPO
